

Download Cell Reproduction Study Guide Answer Key

Answer to: Compare and contrast asexual and sexual reproduction By signing up, you'll get thousands of step-by-step solutions to your homework...Example of Facilitated Diffusion. In the cell, examples of molecules that must use facilitated diffusion to move in and out of the cell membrane are glucose, sodium ions, and potassium ions. SEEDS. Seeds vary considerably in size. Orchids, for example, produce seeds as small as dust particles. The coconut is one of the largest seeds in the plant kingdom.; In many seeds, the protective outer seed coat is resistant to physical damage and may also contain waxes and oils that help prevent water loss.; The embryo within the seed begins as a single cell, the zygote.
